

Guardian Wireless Alarm System

Product Code: **HJM340**

Description:

The Guardian is a modern wireless falls alarm system. Its fundamental purpose is to act as a pressure-sensitive warning system to alert nurses and carers to unexpected and potentially dangerous movements from users. Triggered by a release or applied pressure to a surface, the Guardian can be configured to suit an extensive range of situations and requirements.

Key Features:

- Safe and versatile wireless system
- Compatible with most nurse call system*
- Simple to set up and use
- Up to 12 months of battery life for the transmitter and up to 3 months for the receiver.
- Pair with up to 8 transmitters.
- Can be paired with a variety of sensor mats to suit different situations.
- Automatically adjusts the trigger depending on which sensor mat is used.
- Patient care function reverts to normal operation after 10 minutes (no alarm triggers while giving care). Works on both normally open and normally closed systems.
- Silent alarm function (activates nurse call system with no noise at the source).
- Low battery warning for receiver and transmitters (before function is interrupted).
